

DYNAMICS 365 MIGRATION ASSESSMENT

START YOUR JOURNEY TO THE CLOUD

We create a Promising Future in partnership with our valued Clients, providing industry expertise and know-how to guide and advise you on your business and digital transformation journey. Our focus as a long-term partner is to provide a holistic review of your business, and our expertise enables us to understand your challenges and opportunities in moving you to the most up-to-date, and fully supported technology platform. This approach puts you at the forefront of our focus and brings technology solutions to life within your organisation, empowering key decision-makers and stakeholders, driving productivity, reducing operational costs and improving service to your customers. We call this CUSTOMER FIRST.

DYNAMICS MIGRATION ASSESSMENT

If you are running a Microsoft Dynamics AX solution and want to transform and evolve to the latest Cloud solution, Nexer will review your solution, explain the benefits of migrating to Dynamics 365 and recommend the best approach for the program of digital transformation and evolution to Dynamics 365 for your business. We will engage with you as your technology partner to:

- Understand the benefits of moving to Dynamics 365 in the cloud
- Identify business objectives and tie these into the functionality of Dynamics 365 and Microsoft Cloud solution

ASSESSMENT WORKSHOPS

To complete the assessment, Nexer will conduct interviews with business stakeholders and key personnel and assess solution artefacts. This will be conducted through a series of workshops with your Subject Matter Experts (SME's):

- Initiation & Planning
- Business Process Assessment
- Functional Assessment
- Technical Assessment
- High-level Migration Summary

DELIVERABLES

As part of our engagement, we will produce a key deliverable called the "Migration Assessment Report" highlighting:

- Business Background
- Scope & Objectives
- Review of Current Solution
- Code Analysis
- Recommended Solution, Deployment & Migration Approach
- High level Estimated Effort and Plan

EXTENDED ASSESSMENTS

Based on our findings from the assessment workshops we can recommend further analysis in specific areas, where a deeper dive would be beneficial.

ARE YOU EXPERIENCING

- An old non-supported Dynamics AX system?
- That the business can't grow in the desired pace?
- Need for deeper insights in customer needs and behaviours?
- Need for more automated processes?
- Challenge to benefit from the new technologies?
- Lack of real-time visibility into your operations?
- High cost for maintaining your own infrastructure?
- A challenge to keep up with latest version?

WHAT'S IN IT FOR ME?
